Hi Hiring Team,

I'm applying for the Customer Support role. I have 2 years of customer support experience, including live chat for a UK telecom account: billing and account concerns, service orders and upgrades, and retention offers for upset customers. I worked in internal CRM and ticketing systems every day, including Salesforce and Microsoft Dynamics 365.

My earlier roles in client documentation and PBX/telephony projects mean I'm comfortable with both paperwork-heavy and technical issues, and I write clearly and calmly under pressure.

On the side, I do graphic design and video editing, so I can also help with graphics or short videos when needed. Portfolio: jerichojake.netlify.app.

I work remotely, I'm flexible for US, UK, and Australian time zones, and I'm available to start right away.

Thank you for your time.

Jericho Jake Guevara
