Hi,

Good day. I'm applying for the Shopify Virtual Assistant / Customer Support / Web Design and Development role.

I have experience handling Shopify stores and working in customer support. I've built and managed demo and client stores, including product listings, store setup, and basic design improvements. I also worked as a Customer Service Representative where I handled daily chat support, resolved customer concerns, and maintained high performance in response time and customer satisfaction.

I'm comfortable working with tools like Shopify, Zendesk, and Figma. I also have knowledge in HTML and CSS and JavaScript, which helps me adjust store design when needed.

I'm someone who asks questions when I don't understand something, and I make sure I learn fast so I can do the job properly. I also take my work seriously and always try to improve my performance.

You can check my portfolio here: <https://jerichojake.netlify.app/>

I'm available to start anytime. I'd be glad to discuss how I can help your team.

Thank you.

Jericho Jake Guevara
